Summary

Senior Product Designer with 3.5+ years of experience designing SaaS products, WordPress plugins, and digital experiences that simplify complex workflows. Experienced in product strategy, design systems, frontend implementation, and AI-assisted workflows, collaborating with leadership, engineering, and marketing teams to ship products from concept to launch.

Professional Experience

Senior Product Designer
rtCamp
Jun 2026 – Aug 2026

Full-time
Remote, Pune, Maharashtra

- Partnered directly with the CMO to define and design rtCamp’s brand guidelines and scalable design system.
- Collaborated closely with the marketing team to design websites, campaign assets, and digital experiences that strengthened the rtCamp brand.
- Built reusable design foundations and component libraries that improved consistency across marketing and product initiatives.
- Worked closely with developers to translate designs into implementation-ready experiences with high visual and functional quality.

Design Specialist
Brainstorm Force
Nov 2024 – April 2026

Full-time
Remote, Pune, Maharashtra

- Led product design across OttoKit and SureContact, creating streamlined product experiences focused on clarity, speed, and usability.
- Designed onboarding, activation, pricing, upgrade, and conversion flows that improved time-to-value for new users.
- Built scalable design systems, reusable components, and consistent interface patterns to accelerate product development.
- Rebranded SureTriggers into OttoKit, owning brand identity, website redesign, and product interface modernization.
- Redesigned the Astra WordPress theme dashboard to simplify workflows, improve usability, and modernize the admin product experience.
- Designed automation workflows, triggers, actions, templates, and multi-step experiences for OttoKit’s core platform.
- Partnered closely with product managers, engineers, founders, and growth teams to ship high-impact releases rapidly.
- Developed and launched an AI-powered internal tool that enabled designers to generate and customize scalable design systems faster.
- Produced high-fidelity mockups, prototypes, and implementation-ready specifications for efficient handoff and QA.

- Worked across product design, frontend implementation, AI-assisted workflows, and WordPress development to ship product and marketing experiences rapidly.
- Designed and developed responsive SaaS marketing websites including OttoKit, SureContact, and Sigmize using WordPress, Astra, Spectra, and custom front-end implementation.

UI/UX Designer

tCognition Inc.

Nov 2023 – Nov 2024

Full-time

Kolhapur, Maharashtra

- Led design efforts for B2B Conversational AI products with strong focus on usability and business outcomes.
- Redesigned the website for mobile responsiveness and smoother navigation, reducing friction across key customer journeys.
- Modernized the website experience with stronger visual consistency and trust-building elements that supported conversions.
- Simplified core flows and improved information hierarchy, leading to better engagement and repeat visits.
- Collaborated with developers and product managers using Agile methodology to ensure timely delivery.
- Authored comprehensive brand guidelines that improved consistency across all digital platforms.
- Increased social media growth to an average of 150 followers per hour through stronger brand execution.
- Introduced Notion to streamline project management and improve execution efficiency.

UI Designer

Independent Projects

Sep 2023 – Nov 2023

Freelance

Remote

- Designed polished, high-precision interfaces using style guides, wireframes, prototypes, and component systems.
- Created personas, empathy maps, and user stories to identify product pain points and improvement areas.
- Generated innovative concepts using Crazy Eights, competitive audits, and rapid ideation workshops.
- Produced low and high-fidelity wireframes across mobile and web platforms.
- Ensured accessibility standards were considered throughout the design process.

Product Designer

Wednesday Solutions

Nov 2022 – Sep 2023

Full-time

Pune, Maharashtra

- Designed digital product experiences that helped clients grow adoption and improve customer engagement.
- Converted business requirements into intuitive interfaces aligned with user and company goals.
- Collaborated with clients to design complete end-to-end product experiences matching their vision.
- Designed a mobile application flow that achieved a 68% Net Promoter Score after multiple design iterations.
- Built interactive prototypes, production-ready interfaces, and scalable visual systems using Figma and Webflow.

Featured Projects

Papr Editor Plugin

<https://wordpress.org/plugins/papr-editor>

WordPress Plugin

- Designed and developed a distraction-free writing experience plugin for the WordPress block editor using React and Gutenberg APIs.
- Published and maintained the plugin on WordPress.org including SVN-based deployment and update workflows.
- Focused on improving editor usability, distraction-free workflows, and custom React-based frontend interactions within the Gutenberg ecosystem.

Pottr

Product Exploration

<https://pottr.tangible.com>

- Currently building Pottr, a WordPress plugin that enables structured data, APIs, app users, and backend events for modern web applications.
- Leading the product experience and using AI-assisted development to explore how WordPress can serve as the application layer for client portals, directories, booking tools, lightweight SaaS products, and other web applications.
